So is there a staffing need or not?

Rob Parker is still going to be the lead for our region for the animas work and he is also the lead on CFAC. Johanna

I'd like to talk further and maybe it's the conversation with you bill victor and I that can cover this. One question, I thought the Upper Animas work was covered with the support you were anticipating from R6?

Sandy – The position justification paper we attached to yesterday's meeting should provide you with information on the priorities that displace CFAC but namely it's the upper animas, mine site coordination/information requests being driven by GKM and Pavillion. I reattached the paper here for convenience. Let me know if you need more on this issue.

Schedule-wise I can't find a time for you, me and Bill to talk until Nov 19th so will send out an invite for then. johanna

Victor

I'd be interested in better understanding the other priorities you are alluding too, especially in light of the potential resource needs we talked about yesterday. Can we talk the week of 11/9?

Subject: Anaconda Aluminum (CFAC) finalizing placement to the NPL

Due to workload priorities, the preparation of the response to comments on the proposal of the Anaconda Aluminum (CFAC) near Columbia Falls, MT to the NPL is being postponed. Thus, finalizing the NPL listing for this site will not occur in the Spring federal register notice. I anticipate that the response to comments will be completed so the site can be finalized in the Fall 2016. Let me know if you have any concerns about this issue.
